

# Energy performance certificate (EPC)

12 Hawthorn Terrace Shilbottle ALNWICK NE66 2XA	Energy rating <b>F</b>	Valid until: <b>30 October 2033</b>
		Certificate number: <b>9390-2089-6300-2777-0151</b>

**Property type** End-terrace house

**Total floor area** 95 square metres

## Rules on letting this property

### ! You may not be able to let this property

This property has an energy rating of F. It cannot be let, unless an exemption has been registered. You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to [improve this property's energy rating](#).

## Energy rating and score

This property's current energy rating is F. It has the potential to be D.

[See how to improve this property's energy efficiency.](#)

Score	Energy rating	Current	Potential
92+	A		
81-91	B		
69-80	C		
55-68	D		68 D
39-54	E		
21-38	F	22 F	
1-20	G		

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Roof room(s), insulated	Very poor
Window	Fully double glazed	Average
Main heating	Electric storage heaters	Average
Main heating	Electric storage heaters	Average
Main heating control	Automatic charge control	Average
Main heating control	Manual charge control	Poor
Hot water	Electric immersion, off-peak	Poor
Lighting	Low energy lighting in 50% of fixed outlets	Good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

## Primary energy use

The primary energy use for this property per year is 1093 kilowatt hours per square metre (kWh/m<sup>2</sup>).

► [About primary energy use](#)

## Additional information

Additional information about this property:

- Cavity fill is recommended
- Stone walls present, not insulated

### How this affects your energy bills

An average household would need to spend **£5,637 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £2,848 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 30,899 kWh per year for heating
- 2,388 kWh per year for hot water

### Impact on the environment

This property's current environmental impact rating is G. It has the potential to be E.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year. CO<sub>2</sub> harms the environment.

## Carbon emissions

<b>An average household produces</b>	6 tonnes of CO2
<b>This property produces</b>	18.0 tonnes of CO2
<b>This property's potential production</b>	7.2 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Changes you could make

► [Do I need to follow these steps in order?](#)

## Step 1: Room-in-roof insulation

Typical installation cost	£1,500 - £2,700
Typical yearly saving	£1,707
Potential rating after completing step 1	<b>41 E</b>

## Step 2: Cavity wall insulation

Typical installation cost	£500 - £1,500
Typical yearly saving	£120
Potential rating after completing steps 1 and 2	<b>43 E</b>

## Step 3: Internal or external wall insulation

Typical installation cost	£4,000 - £14,000
Typical yearly saving	£412
Potential rating after completing steps 1 to 3	<b>49 E</b>

## Step 4: Floor insulation (suspended floor)

Typical installation cost	£800 - £1,200
Typical yearly saving	£289
Potential rating after completing steps 1 to 4	<b>53 E</b>

## Step 5: Hot water cylinder insulation

Add additional 80 mm jacket to hot water cylinder

Typical installation cost	£15 - £30
Typical yearly saving	£40
Potential rating after completing steps 1 to 5	<b>54 E</b>

## Step 6: Low energy lighting

Typical installation cost	£30
---------------------------	-----

---

**Typical yearly saving**

£73

---

**Potential rating after completing steps 1 to 6****55 D**

---

## Step 7: Solar water heating

---

**Typical installation cost**

£4,000 - £6,000

---

**Typical yearly saving**

£29

---

**Potential rating after completing steps 1 to 7****56 D**

---

## Step 8: Replacement glazing units

---

**Typical installation cost**

£1,000 - £1,400

---

**Typical yearly saving**

£179

---

**Potential rating after completing steps 1 to 8****59 D**

---

## Step 9: Solar photovoltaic panels, 2.5 kWp

---

**Typical installation cost**

£3,500 - £5,500

---

**Typical yearly saving**

£712

---

**Potential rating after completing steps 1 to 9****68 D**

---

## Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

### Who to contact about this certificate

## Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

---

**Assessor's name**

John Foley

---

**Telephone**

07985 980868

---

**Email**[jvfoley@gmail.com](mailto:jvfoley@gmail.com)

---

## Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.
